

# Simplifying Fleet and Commercial EV Charging

Electrify your fleet without the complexity and with zero upfront capital costs. **Alectra Energy Solutions** covers the upfront investment and manages the entire process, so you can stay focused on your core business.

## Your End-to-End Electrification Partner

Through our Energy-as-a-Service model, we deliver customized solutions across Canada that include planning, installation, operations, and maintenance, tailored to meet the long-term needs of your fleet.

### Planning & Financing

- Zero upfront cost
- Customized electrification roadmap
- Site capacity & feasibility assessments
- Scalable solutions that grow with you

### Design & Installation

- Agnostic technology selection
- Depot & on-route charging
- Integration with fleet management systems
- Microgrids & on-site renewables
- Coordination with utilities

### Operations & Maintenance

- Uptime guarantees
- System monitoring
- Comprehensive maintenance
- Energy management & load optimization
- Ongoing reporting & data insights

# Full-Service EV Charging Solutions

## No Upfront Capital

We fund the infrastructure to remove financial barriers.

## Simplified Process

From planning to operation, we manage it all so you don't have to.

## Custom Technology

Hardware and software solutions tailored to your fleet needs.

## Reliable Operations

We own, operate, and maintain more than 100 EV charging stations, so you get guaranteed uptime and worry-free performance.

## Smarter Energy Use

We help manage energy costs and integrate renewables where it makes sense.

## Expert Support

Our team brings proven experience across transit, commercial, and municipal fleet projects.

## Proven Experience

- 100+ EV charging stations owned, operated and maintained by AES
- Experience across municipal, transit, and commercial fleet projects
- Backed by the largest municipally-owned electricity utility in Canada
