

# EV Charging Solutions

---

Innovative and reliable solutions to meet the needs of your business.

## Customized Charging Solutions

Alectra Energy Solutions is the experienced partner you need to navigate the complexities of electrifying your fleet. We combine our eMobility expertise with our proven energy solutions (microgrids, energy storage, solar PV, DER) and utility know-how to deliver results. Managing critical energy infrastructure is our strength. Let us show you how we can remove key execution, financial and operational risks from your EV projects.

## Leading the eMobility Transition

By assuming the implementation, financing, and operational risks, we provide a partner-based approach, allowing businesses to focus on core operations while achieving decarbonization goals efficiently.

With depot and on-route charging, L2, L3 DCFC solutions, and all supporting energy infrastructure, Alectra Energy Solutions is the ideal partner in your electric mobility transition.

Elevate your electric mobility journey with us.
