

**Fleet
Electrification.
Simplified
and Scaled.**

The Benefits of Fleet Electrification

Electrifying your fleet is a powerful way to meet sustainability goals while improving efficiency and reducing costs. Alectra Energy Solutions delivers tailored, end-to-end strategies to unlock your fleet's full potential.

Lower Total Cost of Ownership

Our team helps you access any available government incentives and OEM programs while implementing cost-saving strategies to reduce your long-term operating expenses.

Meet Sustainability Goals

With our deep utility expertise and emissions-focused planning, we guide your business toward impactful carbon reduction goals and regulatory compliance, reinforcing your sustainability commitments.

Enhance Fleet Operational Efficiency and Resiliency

We combine smart charging with distributed energy solutions like battery storage to optimize fleet uptime, reduce operational costs, and enhance infrastructure resiliency—ensuring reliable performance and greater control, while minimizing business interruptions.

Turnkey EV Charging Solutions

Alectra Energy Solutions (AES) is a trusted partner in delivering comprehensive electric vehicle (EV) charging infrastructure tailored for fleet operators. Whether you're transitioning light, medium or heavy duty fleets, AES provides turnkey, future-ready EV charging solutions that simplify the electrification journey for fleets of any size.

Backed by the long-standing stability and energy expertise of Alectra Inc., we offer a reliable partnership built to support your fleet's electrification needs today—and scale seamlessly with your growth tomorrow.

How AES Simplifies the Journey

1

Electrification Plan & Financing

AES offers customized planning tailored to your fleet's size, industry, and geographic needs—with **zero upfront capital required** and strategies designed to reduce long-term operating costs.

2

Infrastructure & Installation

AES provides reliable depot and on-route charging solutions powered by strategically-chosen technologies and distributed energy resource designs ensuring your investment is future-proof, scalable and resilient.

3

Operations & Maintenance

From guaranteed uptime and optimized charging to detailed data analytics and robust maintenance—AES ensures your fleet performs efficiently day after day.

4

Ongoing Partnership

AES coordinates with local utilities, manages approvals, and scales infrastructure as your fleet grows—so you can focus on your core business.

Get In Touch

Partnering with us enables customers to access leading-edge technologies without any upfront investment. Let us help reduce your energy costs, increase sustainability and improve your bottom line.
